Description	QTY	Price US \$	Total
12 GAUGE			
This is a far superior round to regular nylon bag LL rounds as the 12ga SOC is composed of a specially shaped Neoprene outer bag and tail that allows it to maintain a very stable, flat flight path. The make-up also allows it to maintain its properties over a wide range of temperatures from -50°C to 100°C. It expands on impact to dissipate energy over a wide area, thus inflicting an adequate but not lethal trauma to the target.		\$ 8.95
